## BODY BUILDING

With a model this size, it made sense to construct the legs and body separately. Once the leg design was in place, designers were able to recreate the unique combination of all the different angles and geometric shapes of the body with existing LEGO® elements and two newly developed angled plate elements (also found in the 75304 Darth Vader Helmet set).

The AT-AT body holds a troop section with room for up to 40 snowtroopers, weapons and heavy battle equipment. The upper deck features backpack charger troop benches, fuel cells and energizer rods; the lower deck is a deployment staging platform and a garage with room for four bikes.

## CONSTRUCTION DU CORPS

Avec un modèle de cette taille, il était logique de construire les jambes et le corps séparément. Une fois la conception des jambes terminée, les concepteurs ont été en mesure de recréer la combinaison unique de tous les différents angles et formes géométriques du corps avec des éléments LEGO® existants ainsi que deux éléments de plaques angulaires nouvellement développés (que l'on retrouve également dans l'ensemble 75304 Le casque de Darth Vader™).

Le corps du TB-TT abrite une section pour les troupes pouvant accueillir jusqu'à 40 snowtroopers, des armes et des équipements de combat lourds. Le pont supérieur comprend des bancs avec chargeur de boîtier dorsal pour les troupes, des piles à combustible et des barres d'énergie. Le pont inférieur sert à la fois de plate-forme de déploiement et de garage pouvant accueillir quatre motos.

## CONSTRUCCIÓN DEL CUERPO

Con un modelo de esta magnitud, la idea de construir las patas y el cuerpo por separado resultó ser lo más conveniente. Una vez que se terminó el diseño de las patas, los diseñadores pudieron recrear la singular combinación de ángulos y siluetas geométricas del cuerpo con piezas LEGO® que ya existían y dos placas en ángulo de reciente introducción (que también se encuentran en el set Casco de Darth Vader [75304]).

El cuerpo del AT-AT tiene una sección para tropas con espacio para hasta 40 Troopers de nieve, armas y equipo de combate pesado. La cubierta superior incorpora asientos para las tropas con cargadores de mochila, celdas de combustible y barras de energía; la cubierta inferior funciona como plataforma de despliegue de efectivos y como garaje con espacio para cuatro motos speeder.

# MEET THE MODEL DESIGNER

Henrik Andersen  
LEGO® Star Wars™ Designer

Jens Kronvold Frederiksen  
Design Director & Creative Lead,  
LEGO® Star Wars™

Directeur de la conception et  
responsable de la création,  
LEGO® Star Wars™

Coordinador de diseño y  
director creativo  
LEGO® Star Wars™

I've built with LEGO® bricks all my life, I've worked as a LEGO designer for over 20 years and designed over a hundred models and two hundred new elements. And for as long as I can remember, this model has been at the top of my design list, and on LEGO *Star Wars* fans' wish lists. The AT-AT walker is one of the most intimidating vehicles in the *Star Wars* universe. It's super tall and scary to the Rebels on the ground of Hoth, so of course our model had to live up to that. It's more than 23 in. (60 cm) tall, consists of more than 6,700 LEGO pieces and weighs about 13 lbs. (6 kg). The sheer size, weight and mechanics of it made it a daunting challenge. As always, when designing LEGO models, it helps to spar with other designers, and we were able to make the model authentic, stable and displayable by incorporating a few elements developed by other projects, and just one new element. I'm very pleased to see it come to life.

## RENCONTRE AVEC LE CONCEPTEUR DU MODÈLE

Henrik Andersen  
Concepteur LEGO® *Star Wars*™

J'ai construit avec des briques LEGO® toute ma vie, j'ai travaillé comme concepteur LEGO pendant plus de 20 ans et j'ai conçu plus de cent modèles et deux cents nouveaux éléments. Et aussi longtemps que je me souviens, ce modèle a trôné au sommet de ma liste de conception, et figuré sur la liste de souhaits des amateurs de LEGO *Star Wars*. Le marcheur TB-TT est l'un des véhicules les plus intimidants de l'univers *Star Wars*. Il est gigantesque et terrifiant pour les Rebelles rivés au sol sur Hoth, et notre modèle devait évidemment être à la hauteur. S'élevant à plus de 60 cm (23 po) de hauteur, le modèle compte plus de 6 700 pièces LEGO et pèse environ 6 kg (13 lb). Sa taille, son poids et sa mécanique en ont fait un défi de taille. Lors de la conception de modèles LEGO, il est toujours utile d'échanger avec d'autres concepteurs, et nous avons pu rendre le modèle authentique, stable et attrayant en incorporant quelques éléments développés par d'autres projets, et en ne créant qu'un seul nouvel élément. Je suis très heureux de le voir prendre vie.

## CONOCE AL MODELISTA

Henrik Andersen  
Diseñador de LEGO® *Star Wars*™

Toda mi vida he construido con bricks LEGO® y, en mis más de 20 años como diseñador de LEGO, he diseñado más de cien modelos y doscientos nuevos elementos. Desde que tengo memoria, este modelo ha estado en la cúspide de mi lista de diseños y de las listas de deseos de los fans de LEGO *Star Wars*. El caminante AT-AT es uno de los vehículos más aterradores del universo *Star Wars*. Para los rebeldes que combatían desde el suelo en Hoth resultaba enorme e imponente al extremo, por lo que el modelo no podía hacer menos que eso. Mide más de 60 cm de alto, consta de más de 6700 piezas LEGO y pesa cerca de 6 kg. Un gran tamaño y peso, así como una complejidad mecánica inusitada, hicieron de este proyecto un desafío colosal. Como siempre, al diseñar modelos LEGO resulta útil intercambiar opiniones con otros diseñadores; logramos hacer que el modelo fuera auténtico, estable y digno de exhibirse incorporando algunos elementos desarrollados para otros proyectos y solo uno completamente nuevo. Estoy encantado de haberlo visto cobrar vida.
